In this first released version, this program only supports Windows 7 and Windows Vista. Of course, users of Windows 7 can use Adobe Photoshop CS6; it is a free update installing in the background if you already bought Photoshop CS6. The new software update can be downloaded for free from the Apple App Store beginning December 23, 2011. However there will be a download delay on an Android device because Apple doesn't allow apps purchased from other sources to be installed on Android or any other mobile device. This includes the Adobe software update, but not apps for iOS. Once the update has been downloaded, users will have to watch an video for Apple approval. The Photoshop software update from the App Store is no small download, so we recommend you wait until you get home from work or until your favorite store, such as Amazon or Best Buy, is open and ready to download the app. First, you'll see a splash screen, and then be prompted to confirm the permissions needed. With the software update, you will now see Adobe Photoshop CS6 or Photoshop 2026, depending on your OS, in the App Store app. Users of earlier versions of Photoshop, Adobe Preview, or Photoshop CS6 will see a notification that they can download the update via the App Store. When the Photoshop update has finished, you will be prompted to restart to complete the update. Once you have restarted OS X, it is time to download Adobe Photoshop. This will be found under Store and then Apps.

To virtually walk-thru the first 2 steps, there are 2 things that you will need to do. Firstly you will need to open up the right app that is going to allow you to crop photos and if you are using the whole Adobe Creative Cloud then you will want to upload your photos to a content management system such as Adobe Lightroom which will allow you to further enhance your photos. Given we have already talked about the Lightroom app, I'd like to point out that you can access the Lightroom app anywhere you want.

The second step is to open up the right app that is designed to work with the phones screen. If you have the Adobe Creative Cloud app on your phone then you should always make sure that it is open. If you have not downloaded the app onto the device that you are going to use then you can use the Creative Cloud website if you start up your browser. In the website, just click on the download button that is highlighted below. A pop-up will appear on your phone and you can read the following terms of service. Once you click 'Agree' to proceed with the download, your phone will go through the download process and will let you know when it's completed. To begin editing a photo you first need to open up Photoshop from the app that you downloaded. Within the app you will find a new icon that looks like an envelope. Clicking on that will give you access to the Photoshop Tools which will allow you to crop, enhance, and retouch your photos. Now give it a test shot of your favorite food and don't hesitate to change the color if you want to make one of your favorite foods look even better.

Remember if you don't want to work with the whole Photoshop app, then you can open the 2 panels above to use as a viewfinder. If you are someone who likes to customize their interface on your phone, and, if that is the case, then you can give an even stronger set of tools to alter or modify the look and feel of the app to make your editing space as efficient as possible. You can also use the Palette to add to the color of a photo as you are editing it in the app. 933d7f57e6
